

# SANDRA

A developer guide

May 30, 2012

# Contents

# Introduction

Sandra is a CMF/CMS with a simple goal : make it easy to extend. Maybe it will not as clean as it should be, maybe some mechanisms will look strange, but the final goal is to propose a simple and easy to extend tool to help you build websites.

Sandra is built over PHP 5.3 and use a lot of classic libraries from scratch for its own :

PHP's functionalities :

- spl\_autoload
- PHAR format

Librairies :

- Twig
- jQuery
- Bootstrap
